PROFILE

Product Owner and Product Manager with a designer's eye. Six years in product roles on search, video streaming and education platforms used by millions, working with teams from 20 to over 1,000 people. Since 2022 I have specified and shipped 8 public products myself — from a B2B wellbeing-assessment pilot to learning apps and games — writing the spec and user stories and building with AI coding tools.

EXPERIENCE

Independent Product & Game Designer — Rotterdam 2022 – now

- Specified, built and shipped 8 public projects (7 live), in up to 9 languages — early-stage, preparing first user tests; portfolio at maryamjaberi.github.io.
- **Workplace Wellbeing Check** — anonymous wellbeing assessment for organisations: 8 validated questionnaires, report by job level, matched workshops; EN/NL/FA pilot.
- **Dour** and **Dour: Language** — offline party game and CEFR-based language-learning game; design document, epics, user stories, freemium model, 10-scenario QA checklist.
- **Chrono Atlas** and **Psychology Wiki** — sourced educational map of Earth through time; 85-page linked Persian knowledge base.

Product Manager, Search — Hamrahe Aval (MCI) 2020 – 2022

- Led the shopping-search roadmap in a 1,000+ person organisation, using user interviews, usability tests and competitive research to prioritise the backlog.
- Founded and led a zero-to-one Persian speech-recognition initiative: 20+ person crowdsourcing panel, 3,000 hours of validated audio.
- Onboarded 1,000+ retailers; launched Smart Answer Boxes across 20+ services (+10% correct clicks).
- Standardised agile ceremonies and pre-release testing across 12 services, cutting cross-team errors by 10%+.

Associate Product Manager — Arshan Media (GapFilm) 2018 – 2020

- Owned product strategy for a multi-platform video-on-demand service (Android, Android TV, web, kids, CMS).
- Grew users from 60,000 to over 5 million through data-driven campaigns and UX improvements; raised average session engagement by about 5 minutes.
- Scaled the CMS fourfold to support 100+ admins; ran A/B tests and usability studies with design before launches.

Product Owner — Shaya Smart Technologies 2016 – 2018

- Owned the backlog of Payame Noor University's digital learning platform (19 million students); introduced Scrum, reducing bugs by about 10%.
- Co-launched MediaAd, which became Iran's second-largest native advertising platform before its acquisition.

SKILLS

Product: roadmaps, discovery, prioritisation, stakeholder management, Agile & Scrum, user stories, metrics & A/B testing

Design: UX research, usability testing, information architecture, service design, game systems, prototyping

Technical: web apps & PWAs, AI-assisted prototyping (Claude, Google AI Studio, Antigravity), Jira, Confluence

Languages: Persian (native), English (B2), Dutch (B1)
